

## Proposal A

I Feel this industry needs a tariff increase. This is based on the grounds of, It has been over 3 years since the previous increase, Fuel prices are surging along with other running costs to name a few. My proposal for the meter increase is for an approximate 10% rise.

**Tariff 1 is currently at £ 3.40 and every subsequent mile is £ 2.00/ 10p every 20th of a mile**

Tariff 1 should start at £3.80 and every subsequent mile being £ 2.20/ 10p every 22nd of a mile.

**Tariff 2 is currently at £ 3.90 and every subsequent mile is £ 2.20/ 10p every 22th of a mile**

Tariff 2 should start at £ 4.30 and every subsequent mile being £ 2.50/ 10p every 25th of a mile.

**Tariff 3 is currently at £ 4.90 and every subsequent mile is £ 3.30/ 15p every 22th of a mile**

Tariff 3 should start at £ 5.40 and every subsequent mile being £ 3.60/ 15p every 24th of a mile.

**Tariff 4 is currently at £ 6.40 and every subsequent mile is £ 4.00/ 20p every 20th of a mile**

Tariff 4 should start at £ 7.20 and every subsequent mile being £ 4.40/ 20p every 22nd of a mile

**Tariff 5 is currently at £ 9.40 and every subsequent mile is £ 6.00/ 30p every 20th of a mile**

Tariff 5 should start at £10.40 and every subsequent mile being £7.00/ 35p every 20th of a mile

Waiting time should also be increased to 20p every 30 seconds from 10p every 30 seconds

I also feel that tariff 2 should be amended to 10pm - 6am 7 days a week.
